

**MAKING BETTER HOME A REALITY  
FOR EVERYONE, EVERY WHERE.**

## WELCOME TO INSPIRA GROUP

Founded in 1979, INSPIRA GROUP, formerly called as ShivShakti Group has been a cornerstone of the construction industry for over four decades. We specialize in supplying essential building materials — bricks, sand, and grit (gret) — to a wide range of clients, from individual homebuilders to large-scale contractors and developers. We aspire to serve our real estate community through our premium quality UPVC Windows and Doors from our state of art factory in Chakan. With more than 40 years of experience, we've built a reputation for quality, consistency, and trust. Our materials are carefully sourced and thoroughly inspected to ensure they meet the high standards required for durable and long-lasting construction. At INSPIRA GROUP, we pride ourselves not just on our products, but on the relationships we've built. We are known for timely deliveries, competitive pricing, and a customer-first approach that has earned us long-standing partnerships throughout the region. With INSPIRA GROUP, you're not just buying materials — you're building with a legacy.

To be the leading provider of high-quality, innovative, and sustainable windows and doors, enhancing the beauty, security, and energy efficiency of homes and businesses worldwide. We strive to set industry standards through cutting-edge design, exceptional craftsmanship, and eco-friendly solutions, ensuring customer satisfaction and long-term value.

## MISSION

At INSPIRA , we design and manufacture premium windows and doors that combine style, durability, and energy efficiency. Our mission is to provide homeowners and businesses with high-quality, innovative solutions that enhance security, comfort, and aesthetic appeal. With a commitment to craftsmanship, sustainability, and customer satisfaction, we strive to deliver exceptional products and services that stand the test of time

Aniti Termite**

**Energy  
Efficient**

**Strength &  
Durability**

**Water  
Tightness**

**Fire  
Resistant**

**Dust  
Proofing**

**Thermal  
Insulation**

**Maintenance  
Free**

# uPVC WINDOWS systems

## Casement Windows

This is a classic style that never goes out of fashion. The window panels open outwards or inwards, from the sides, giving the widest feel of openness

## Sliding Windows

Perfect for areas where opening space is restricted or window sizes are large. Rather than restricting the view using multiple casement panels, we recommend using large sliding panels that give the feeling of expanse.

## Villa Windows

Recommended for ground level windows which may require additional security. The grills are sandwiched between two frames, making their removal impossible. Our profile's elegance and fine finish adds to its value

## Top Hung Windows

Ideal for areas where privacy is of prime concern, yet ventilation is required. They are generally used at ceiling level or in places where view needs to be blocked without restricting the flow of air

## Tilt & Turn Windows

T & T gives you the option to control your environment with precision. It is essentially 3 window types in one: fixed window, casement window, and top hung window. The tilt function allows for top ventilation, easily enabling hot air to quickly escape through the top portion of the window. This also cuts back on allowing strong breezes into the room. The turn function however, creates ample air flow and movement for maximum ventilation.

# uPVC DOORS systems

## Casement Doors

These have hinged sash that swings in or out at an angle of up to 90%. allowing for maximum ventilation and visibility

---

## Sliding Doors

Ideal for spaces with a large cavity, where you wouldn't want to or can't have a swinging door. It gives a wide expanse view. These can be made with two tracks, two and half tracks, three tracks or add on track profiles to accommodate multiple door panel movements and mesh panels.

---

## Slide & Fold Doors

This style of door arrangement is designed to give you the flexibility of partial opening or complete uninterrupted spatial view. It also works as a partition. Multiple sashes are joined in a unique slide and fold mechanism. These can be folded in either direction (left or right) and can be stacked at either end. When closed it is extremely secure with multi point locking system

---

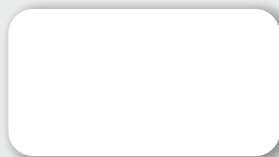

## Lift & Slide Doors

These are extra large panels with glazing to match, which makes them heavy. Recommended for very large window and door cavities for that uninterrupted view and feeling of awesome wide space. Special hardware is used which glides panels back and forth on soft touch rollers, with very little effort

---

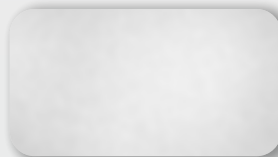

## uPVC COLOR OPTION

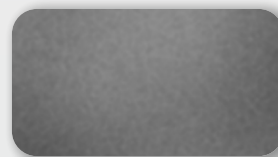

WHITE

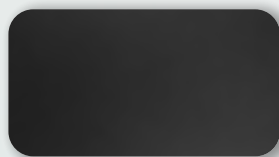

MARBLE

GREY

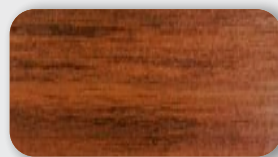

GRAPHITE GREY

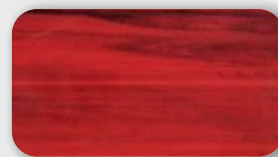

MATTE BLACK

C-BROWN

D-BROWN

R-BROWN

Most window profile manufacturers in the world apply laminates to their uPVC profiles to create a wooden or coloured aesthetic. However, there is a risk that these laminates may peel, get damaged or wear off over time which can degrade the overall look of the doors & windows

We use Profile which are manufactured using Co-extrusion technology, Which has more longer life than any other Profile.

### INSPIRA CO-EXTRUDED PROFILES

STYREX+™  
UV-SHIELD POLYMER

**NO**

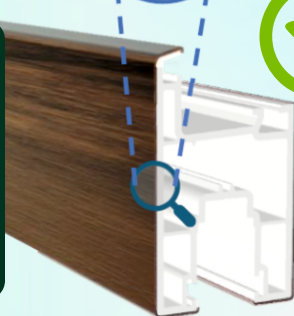

laminates, no Peeling

**HOMOGENOUS**

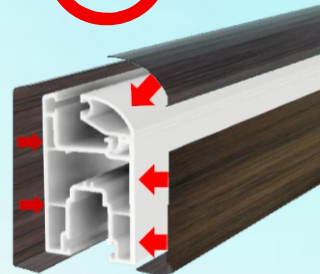

laminates, no Peeling

**IN-BUILT**

UV resistance with STYREX+

### TRADITIONAL LAMINATED PROFILES

**PEELING**

laminates, may peel

**WEAR & TEAR**

prone to rips & scratches
